E-commerce | Web applications | AI-assisted automation

Independent developer | Pakistan

DurraniWebDevelopers.vercel.app

PROFESSIONAL PROFILE

Independent developer building responsive business websites and full-stack applications around real business workflows. Operates Durrani Web Developers as a client-facing web development platform offering services, live templates, pricing and budget tools, and scoped project enquiries. Work spans e-commerce, restaurant ordering, SaaS, admin systems, integrations, and automation. No unverified employment dates, degrees, or years of experience are claimed.

What we build

BUSINESS WEBSITES

Responsive business and service pages, contact flows, SEO foundations, content editing, and mobile-first design.

RESTAURANT SYSTEMS

Digital menus, food catalogues, table QR ordering, WhatsApp checkout, order tracking, and staff tools.

E-COMMERCE

Product catalogues and variants, carts, checkout, inventory, order management, and optional payments.

SAAS AND PORTALS

Multi-role applications, client/vendor dashboards, subscriptions, and workflow management.

BUSINESS OPERATIONS

Admin panels, customer and product records, reporting, data exports, and internal workflows.

SPECIALIST WORKFLOWS

Optional booking, clinic, school, job, event, and industry-specific modules scoped to each project.

Services

Custom website development | Responsive web design | React and Next.js applications | E-commerce development | Website redesign | Supabase and PostgreSQL integration | API integration | AI chatbot and workflow automation | Lead capture | Deployment | Maintenance | Troubleshooting

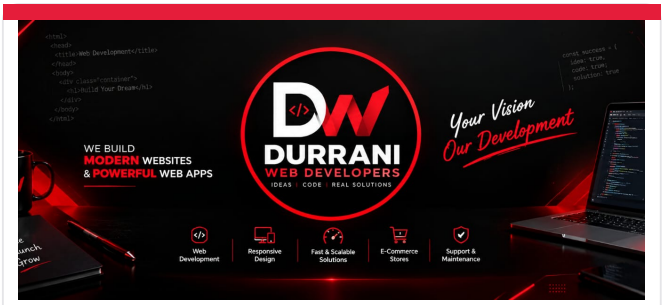

Tools and technologies

BUILD & AI Visual Studio Code, Google Antigravity, ChatGPT
WEB STACK Next.js, React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
DATA & DELIVERY Supabase, PostgreSQL, Git, GitHub, npm, Vercel, API integration
DESIGN & WORKFLOWS UI/UX, Lucide, GSAP, Framer Motion, Three.js where needed, Typebot, Google Sheets

AI-assisted development is reviewed and verified by a human developer. Tools are selected to fit project scope.

SELECTED WORK & LIVE WEBSITE DESIGNS

Project images and links are ordered to match the online CV.

PROJECT 01 — LIVE WEB DEVELOPMENT PLATFORM

Durrani Web Developers

A full-fledged web development platform with service discovery, examples, live templates, pricing, project estimators, and enquiry workflows.

Visit live website >

PROJECT 02 — RESTAURANT | LIVE TEMPLATE

Student Burgers & Shawarmas

Bright, energetic, student-focused food branding. The live demo includes menu browsing, WhatsApp checkout, table QR ordering, order tracking, and an admin panel.

Visit live website >

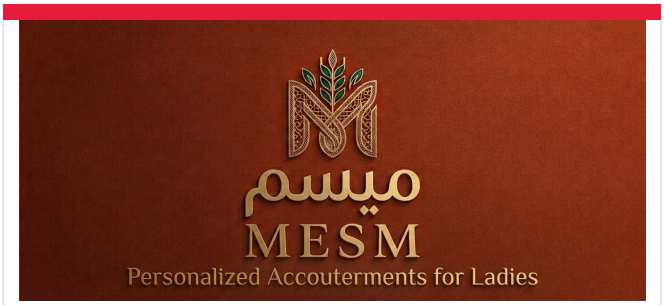

PROJECT 03 — RESTAURANT | LIVE TEMPLATE

Restaurant Name

Premium charcoal design with warm orange and gold accents, editorial headings, and large food photography. Includes menu browsing, QR ordering, order tracking, kitchen tickets, and daily sales tools.

Visit live website >

PROJECT 04 — E-COMMERCE | LIVE STORE

MESM GEMS

Live jewellery storefront with product catalogue, checkout, and WhatsApp order confirmation. Order records are saved before customers continue to WhatsApp; payment is verified by the store team.

- Booking cancellation / refund workflow
- Job portal employer dashboard
- CV upload and application tracking
- Education course progress
- Quizzes and assessments
- Digital tickets and QR check-in

REAL ESTATE & PROPERTYTECH

The pricing catalogue also lists optional PropertyTech modules. These are configurable offerings, not a claim that a real-estate project is currently complete or live.

- Property listing management and submission wizard
- Property media galleries, maps, details, and comparison
- Availability and listing-status management
- Agent directory, profiles, and agency workspace
- Agent verification and review queues
- Real estate lead CRM and analytics
- Exclusive lead-lock workflows
- Property visit and appointment scheduling
- Deal pipeline, transaction, lock, and settlement records
- Fraud reporting and case management
- Portal subscriptions and featured listings
- Property documents and secure file access
- AI property search and lead qualification assistants

SCOPE AND THIRD-PARTY COSTS

Add-ons are optional and are not automatically included in a base website. Estimates are not final quotes; features, compatibility, and cost are confirmed after review. Clients arrange and pay for domain registration, paid hosting plans, payment-provider accounts, gateway fees, and external API subscriptions or usage. DWD deployment work on Vercel is included in the agreed web-app budget; paid Vercel hosting is separate.

EXPERIENCE | Independent, project-based development

Project-based work spanning website development, e-commerce, custom web applications, and business automation. Experience is described through the projects and services provided; no employment dates or years are claimed.

Responsive business and commerce experiences | Frontend connected to databases, authentication, and APIs | Chatbot and lead-capture workflows | Deployment support, integration troubleshooting, and maintenance
